

README for the 'inputtrc' package

Tracing Which File Loads Which

(C) Uwe Lueck 2010/11/11

<http://www.contact-ednotes.sty.de.vu>

'inputtrc.sty' produces screen/log messages
'<current> INPUTTING <next>' on LaTeX input commands,
<current> and <next> being file names.

The message indents reflect the input nesting level.
This can be turned on and off, and the "indent unit"
can be chosen. 'RETURNING TO <current>' may be added.

The implementation somewhat resembles packages
'FiNK' and 'inputfile'.

Typesetting the documentation requires the 'nicetext' bundle,

<http://ctan.org/pkg/nicotext>

'inputtrc' is author-maintained in the sense of LPPL below.

'inputtrc.sty', 'inputtrc.pdf', and 'inputtrc.tex'
can be redistributed and/or modified under the terms
of the LaTeX Project Public License; either version 1.3c
of the License, or any later version.

The latest version of this license is in
