1 Setting up Semantic References

In a nutshell: How to set up semantic references? Easy, just use the `omgroup` environment from the `omdoc` package.

2 Testing the References

Now, we test the referencing mechanism

Internal Referencing: First single references: Section 1 and Section 2, and then compound ones: Section 1 and Section 2

External Referencing: First single references: [?, Section 1] and [?, Section 2]
