

# Package ‘yeastRNASeq’

April 20, 2016

**Title** Yeast RNA-Seq Experimental Data from Lee et al. 2008

**Version** 0.8.0

**Author** James H. Bullard and Kasper D. Hansen

**Description** A selection of RNA-Seq data from a yeast transcriptome experiment.

**biocViews** ExperimentData, Saccharomyces\_cerevisiae\_Data,  
SequencingData, RNASeqData

**Maintainer** J. Bullard <bullard@stat.berkeley.edu>

**License** GPL

**Depends** R (>= 2.4)

**Suggests** Biobase, ShortRead, IRanges

**NeedsCompilation** no

## R topics documented:

geneLevelData . . . . .	1
yeastAligned . . . . .	2
yeastAnno . . . . .	2

<b>Index</b>	<b>3</b>
--------------	----------

---

geneLevelData	<i>Yeast gene-level counts from: Lee et al. PloS Genetics 2008.</i>
---------------	---

---

## Description

Gene counts for an Illumina sequencing experiment. These counts represent summarizations over the data in the yeastAligned object using the annotation from the yeastAnno object, both from this package.

## Usage

```
data(geneLevelData)
```

**Source**

A citation for the dataset may be generated using `citation("yeastRNASeq")`.

**See Also**

The package vignette.

---

<code>yeastAligned</code>	<i>AlignedRead list</i>
---------------------------	-------------------------

---

**Description**

A four element list of `AlignedRead` objects from the `ShortRead` package from 4 yeast lanes of a Solexa experiment: Lee et al. PloS Genetics 2008.

The data represents a random subsample of reads from 4 lanes (2 wild-type, 2 mutant lanes)

**Usage**

```
data(yeastAligned)
```

**Source**

A citation for the dataset may be generated using `citation("yeastRNASeq")`.

**See Also**

The package vignette.

---

<code>yeastAnno</code>	<i>Yeast Annotation</i>
------------------------	-------------------------

---

**Description**

Annotation for *S. cerevisiae* downloaded from Ensembl using the **biomaRt** package in the fall of 2009 and post-processed. This file should not be used for analyses purposes, but rather demonstrates some functionality of various packages.

**Usage**

```
data(geneLevelData)
```

**Source**

A citation for the dataset may be generated using `citation("yeastRNASeq")`.

**See Also**

The package vignette.
